Graduate Research Assistant (GRA) appointment available in the College of Nursing

**Time Commitment** 10 hours per week. Position begins Fall of 2019 (August) and is funded through Spring of 2020 (May), with a possibility to renew for an additional year.

**Duties:** Participant recruitment for a study on pediatric asthma management. Training participants to use a bilingual mobile application, as well as troubleshooting. Data collection, including spirometry measurements. Data entry and database management. Other study-related duties as they arise, including activities associated with study dissemination products.

**Required Training:** Spanish fluency is required, as is proficiency with smart phones, mobile applications, and SPSS. Experience with participant recruitment and data management preferred; some travel to the study site will be expected. Background in asthma management would be helpful but not necessary.

Interested graduate students should send a copy of their CV to:
